PODAPATI MANOJ KUMAR

podapatimanoj22@gmail.com | 7032548453 | Kukatpally | github | llinkedin

Summary

AI-focused Full Stack Developer with 1+ year of experience building AI-powered applications and scalable backend systems using Python, FastAPI, React, Node.js, and MySQL. Hands-on experience with **RAG, LLMs, LangChain, LangGraph, vector databases,** including multi-agent workflows for document-based question answering. Experienced in REST API development. AWS Academy Cloud Foundations Certified, with a strong interest in **Generative AI and Agentic AI engineering**.

Skills

Languages: Python, JavaScript
AI & Generative AI: RAG, LLMs, LangChain, LangGraph, NLP, Vector Embeddings, Multi-Agent Systems
Backend: FastAPI, Node.js, REST APIs
Database: MySQL,ChromaDB
Core Competencies: Problem Solving, System Design, Code Review, Technical Documentation

Professional Experience

Full Stack Developer 12/2025 – Present | Hyderabad,India

- Developed scalable backend services and AI-powered web applications using Python, FastAPI, Node.js, and React.
- Built secure REST APIs with JWT authentication and integrated third-party services.
- Automated deployments using Docker and GitHub Actions while collaborating with cross-functional teams.

Full Stack Developer Intern 05/2025 – 11/2025 | Hyderabad,India

- Built REST APIs using FastAPI and improved API performance by **50%** through SQL optimization.
- Integrated payment gateway and messaging APIs.
- Assisted in deploying backend services to production environments.

Projects

Alexa Voice Assistant Chatbot
Technologie : *Python, Alexa Skills Kit, Amazon Developer Console*

- Developed an Alexa skill with Python backend supporting conversational voice interactions.
- Implemented intent handling, slot filling, and dialog management for restaurant recommendations and zodiac sign queries.
- Integrated external data sources to deliver dynamic responses through natural language interactions.

Multi-Agent RAG System
Technologies: *Python, FastAPI, LangChain, ChromaDB,JWT*

- Built a multi-agent RAG system for context-aware question answering from uploaded PDF, TXT, and Markdown documents.
- Implemented Query Planner, Retriever, Answer Generator, and Reviewer agents using LangChain and Ollama (Qwen2.5).
- Developed FastAPI REST APIs with document chunking, Hugging Face embeddings, ChromaDB semantic search, and source-referenced answers.

Education

Bachelor of Technology in Computer Science 7.12 CGPA 2020 – 2024 | Hyderabad, India
MLR Institute of Technology

Intermediate 8.65 CGPA 2018 – 2020 | Vijayawada, India
Narayana Junior College

Achivements

- Selected for the product track in Cisco ThingQbator Ideathon.
- Participated in and completed software testing coursework via NPTEL.
